

# Partnership with TAKEBISHI

Complements thin-edge with wide OT protocol support

## The Partner and the Solution

### TAKEBISHI CORPORATION

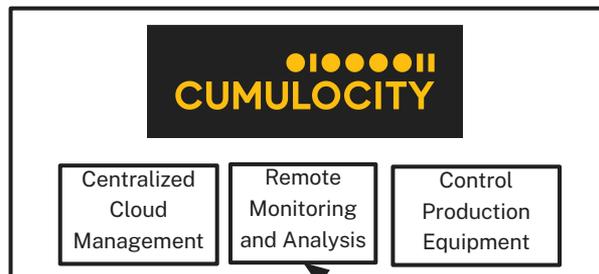

- **Found in 1926**, a leading Japanese company for industrial OT connectivity products.
- **Over 50K licenses sold, global customers in 60 countries.**
- A member of the OPC Foundation since its establishment in 1996.

### DeviceGateway

- **No-code edge device with Docker.**
- **A wide range of device connectivity** 320+ device series from 80+ vendors ([Complete list of supported devices](#))
- **Multiple options for host system interface**  
OPC UA server (IEC 62541), MQTT Pub/Sub, HTTP (REST API), FTP, SQL

## The Integration

- Ready to use device integration
- Cumulocity IoT connects via thin-edge via MQTT bridge
  - MEA, Remote Access, Software mgmt, Configuration Mgmt. etc.

Manufacturing

Energy

Infrastructure

## Your Benefits

- **Fast and easy way of connecting OT devices (PLCs) to Cumulocity IoT**
- **Highly Secure OPC UA communication**
- **Compatibility you can trust** thanks to certification with Cumulocity IoT
- **Support for thin-edge available**
- **No-Code solution with custom logic functionality!**
