Quake Global Launches Battery Powered Equipment Locator for Caterpillar

Quake Global, Inc. (QUAKE), Quake Global, a leading provider of IoT and M2M solutions to global markets, announced the launch of a Locator product family for Caterpillar, a leading manufacturer of construction and mining equipment, natural gas engines, and industrial gas turbines. This self-contained product is designed to remotely monitor non-powered assets worldwide while operating in extreme conditions.

Designed to have a multi-year battery life in a compact package, the Locator device enables wide usage and broad installation options. The Locator's two-way communication over satellite or terrestrial networks increases the accuracy of GPS asset location and utilization in industrial, construction, and military environments. The "slap and track" technology is an ideal and flexible solution for oil and gas, mining, and construction asset detection. With the ability to connect assets including non-powered tools and equipment, control inventory of remote sites, and improve return of investments, the Locator product is the perfect addition to the IoT world.

"We know that customers rely on Caterpillar's products to develop and optimize infrastructure, energy, and natural resource assets. Quake Global is very proud to work with Caterpillar on this product. It is rewarding to be able to bring something this powerful to the M2M market" stated Polina Braunstein, President and CEO of Quake Global.

About Caterpillar

With 2022 sales and revenues of \$59.4 billion, Caterpillar Inc. is the world's leading manufacturer of construction and mining equipment, off-highway diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. For nearly 100 years, we've been helping customers build a better, more sustainable world and are committed and contributing to a reduced-carbon future. Our innovative products and services, backed by our global dealer network, provide exceptional value that helps customers succeed. Caterpillar does business on every continent, principally operating through three primary segments – Construction Industries, Resource Industries and Energy & Transportation – and providing financing and related services through our Financial Products segment.

About Quake Global

Quake Global, Inc. designs and manufactures industrial machine-to-machine (M2M) devices for asset tracking and monitoring using satellite, cellular, GPS, RFID and other technologies for a wide range of markets, including heavy equipment, transportation, energy, healthcare and other segments.

Quake Global Telematics Products

QConnect™

- ULTRA-COMPACT RUGGED GLOBAL CELLULAR MODEM
- Customize and unify your global asset tracking needs with QConnect. The global, IP67 rugged and programmable QConnect solves your telematics problems even in the toughest environments, that includes LTE / GPS / Wi-Fi / BLE / Ethernet.

Q4000

- SATELLITE AND CELLULAR DUAL MODE MODEM
- The industrial-grade Q4000 features cellular (LTE Cat M / NB IoT), satellite or dual-mode network configurations and fully programmable onboard applications with GPS.
